Change & Requirement in Competitive World - Microsoft PowerPoint

### Innovation - Change

- Innovation is the ability to see change as an opportunity – not a threat
- Without change there is no innovation, creativity, or incentive for improvement
- Those who initiate change will have a better opportunity to manage the change that is inevitable
- Every day we are saying
  - How can we keep this customer happy?
  - How can we get ahead in innovation?
  - If we don't somebody else will
