### Success Mantra for Students – Tips to Manage your TIME

Studying is a big commitment and needs time to work on it. *Managing time is the best way for students to succeed.* By managing your time, other commitments can be fulfilled and you can study without distractions. The problems are real, but make your action plan for the week and stick to it. This will help you study and deal with your other responsibilities in the best way. You need to **balance time**. If you are bad at balancing things make a **personal timetable**. Even if you do not stick to it, you will have an idea what you should be doing each day. This is better than trying to do everything each day and, at the end of the week, not achieve anything.
