Expert Details:

Name: Mr. Dokka Vamsi Krishna

Designation: Assistant Manager - Strategic Pricing, Ohmium India Pvt.Ltd, Bengaluru, Karnataka, India

Organization: Ohmium India Pvt.Ltd, Bengaluru, Karnataka.

Brief details of the event: Department of Mechanical Engineering, PVP Siddhartha Institute of Technology conducted an awareness program on “**Opportunities in future for Hydrogen as renewable energy**” on 23rd March 2023.

Total of around 60 students from III year of the department of Mechanical Engineering have attended the program and benefited with in basic understanding of Hydrogen as alternative renewable energy and inspiration towards research contribution in the emerging sector. Mr. **Dokka Vamsi Krishna** have presented a basic road map of establishing seed company in the sector of hydrogen purification and storage and approaching government for securing the financial assistance in order to work in that direction. He has focused majorly towards the attitude a student should develop in order make a startup and get succeed. Being a young assistant manager resource person was very enthusiastic to share the obstacles that may come across and the strategies to resolve the problems during the steps of promoting hydrogen as an efficient and clean energy. During the session resource person has thrown light on the topic of getting introduced to the customers and steps to be followed in order to maintain cordial relationship with customers as well as with employees of the company. With his elaborate talk he was able to enhance interest of the students in the domain area and the session became a wonderful dialogue-based session, where the students were asking regular questions and expert was generous enough to answer the queries of students.

Few Glimpses of the program:
